Traffic Volume Maps

Introduction

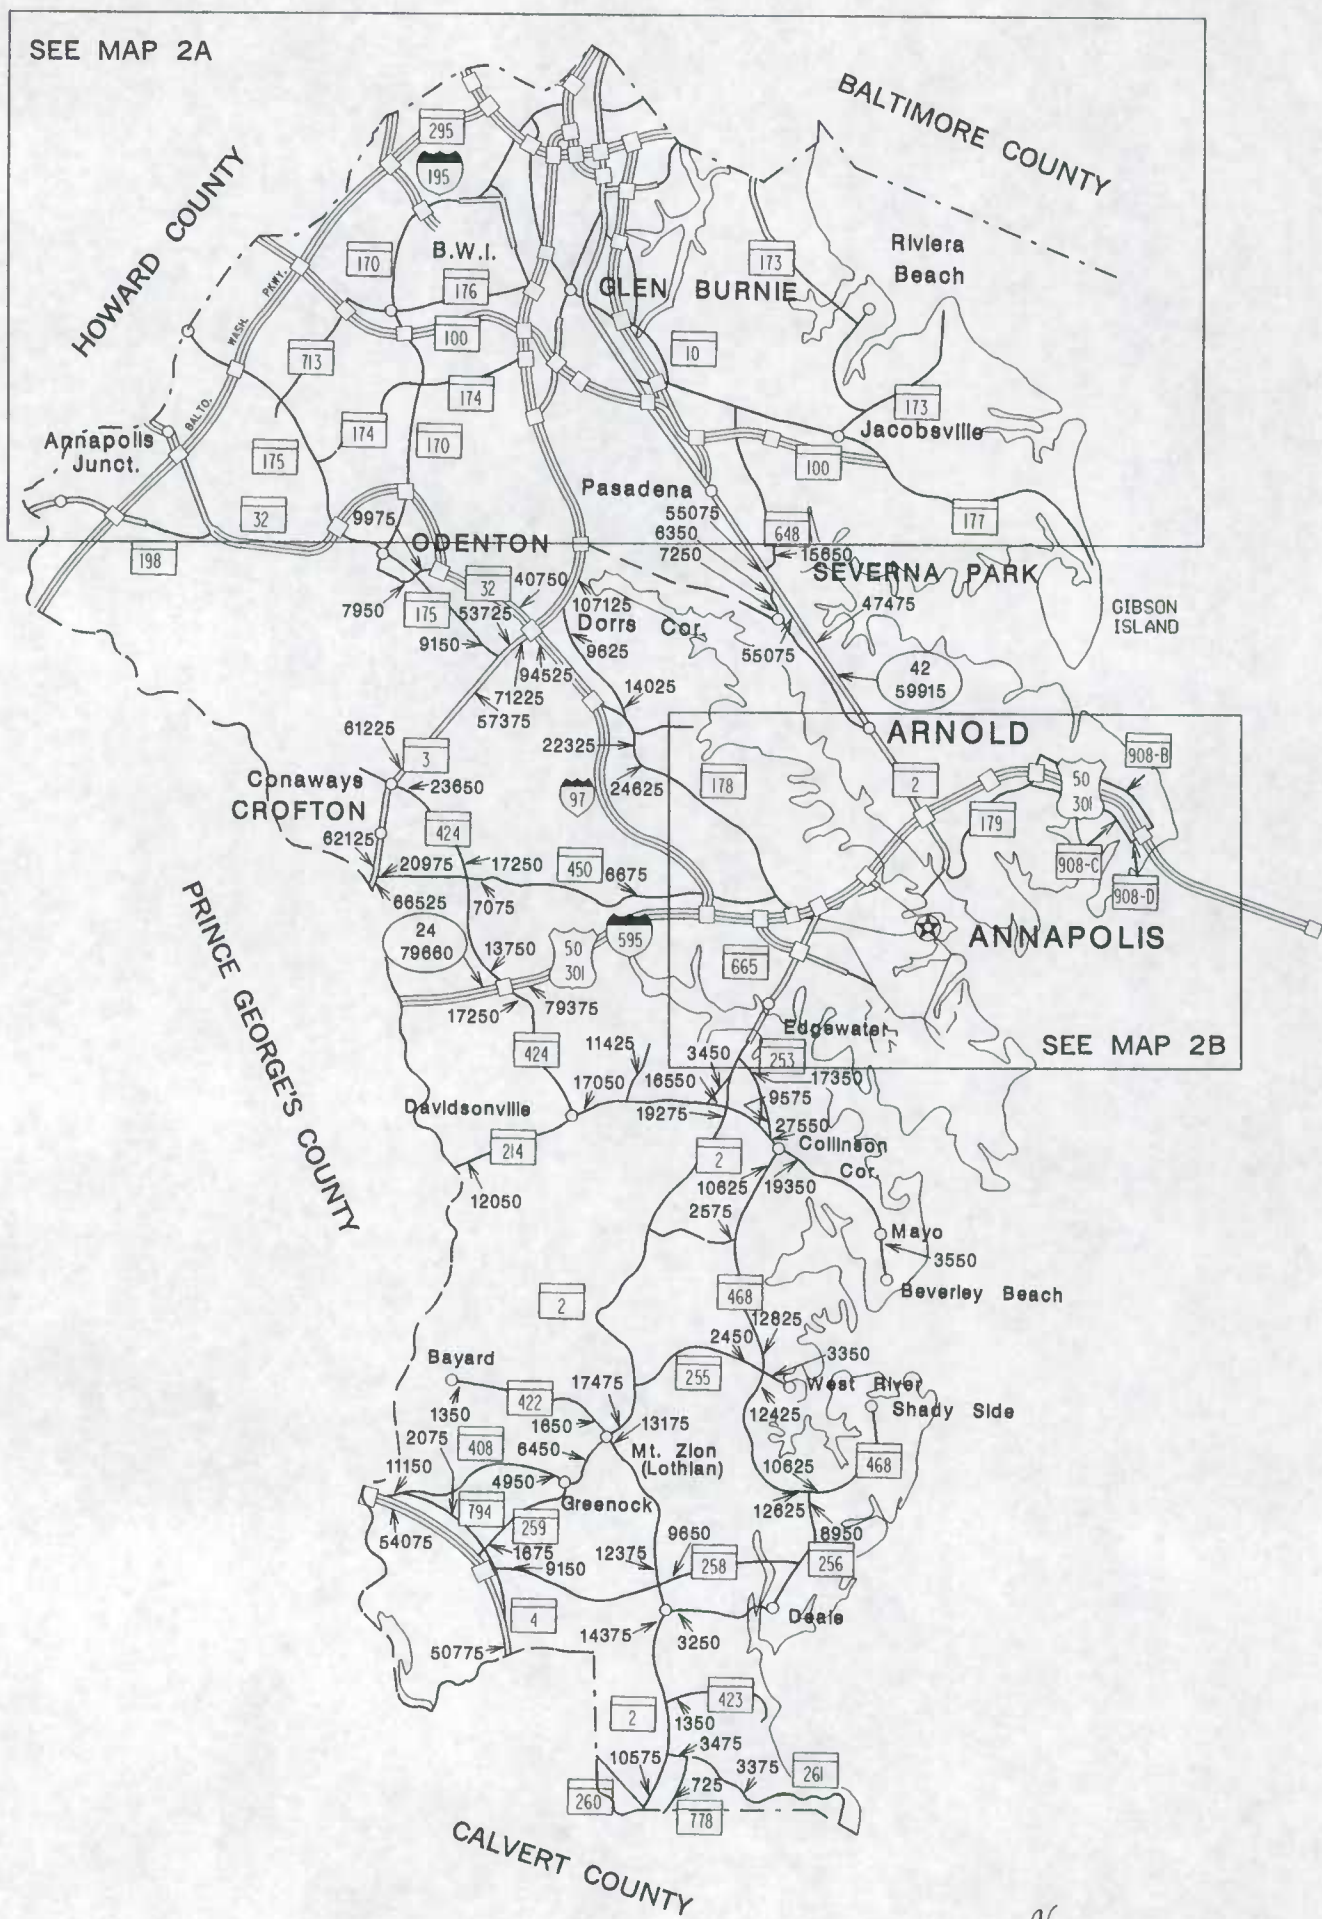

The Highway Information Services Division's Traffic Monitoring System (TMS) Team administers the Maryland State Highway Administration's (SHA) Traffic Monitoring Program. The program is responsible for the collection, processing, analysis, summarization, and dissemination of Maryland highway traffic data and is supported by a comprehensive, user friendly, management information computer database system.

Traffic monitoring data is a strategic resource for SHA and Maryland's Department of Transportation. The data is essential in the planning, design, and operation of the statewide road system, and the development and implementation of state highway improvement and safety programs. TMS is a product of the ISTEA Act of 1991, which required a traffic data program to effectively and efficiently meet SHA's long-term traffic data monitoring and reporting requirements. The quality control feature of the system allow data edit checks and validation for data from the 79 permanent, continuous automated traffic recorders (ATR's) and short-term traffic data.

The Maryland Traffic Volume Maps depict the Annual Average Daily Traffic (AADT) at various locations on Maryland's roadways by county. Traffic volume data is collected from the 3,000± program count stations, 79 automated traffic recorders (ATR), and the 7 toll count stations located throughout Maryland. Program count data is collected (both directions) at regular locations on a three year cycle (one-third of these are counted each year). The other two-thirds are factored based on the past yearly growth of an associated ATR. Counters are placed for 48 hours on a Monday or Tuesday and are picked up that Thursday or Friday, respectively. The ATR and toll count data is collected on a continuous basis.

All route, traffic, and travel data being made available by SHA in these maps are developed to support internal uses, primarily transportation planning. Any and all data are provided **"as is"** with the understanding that no warranty of any kind, implied, expressed or statutory, is given with respects to the contents of these maps. Any and all conclusions or products derived from the data are sole responsibility of the user.

The information presented in these maps is considered public information and may be copied or distributed.

With No Data Available

The information in these maps is provided as a public service
by the Maryland State Highway Administration (MSHA).

NOTICE:

Annual Average Daily Traffic (AADT) figures are estimates.
The AADT estimates are derived by taking 48 hour machine
count data and applying factors from permanent count stations.

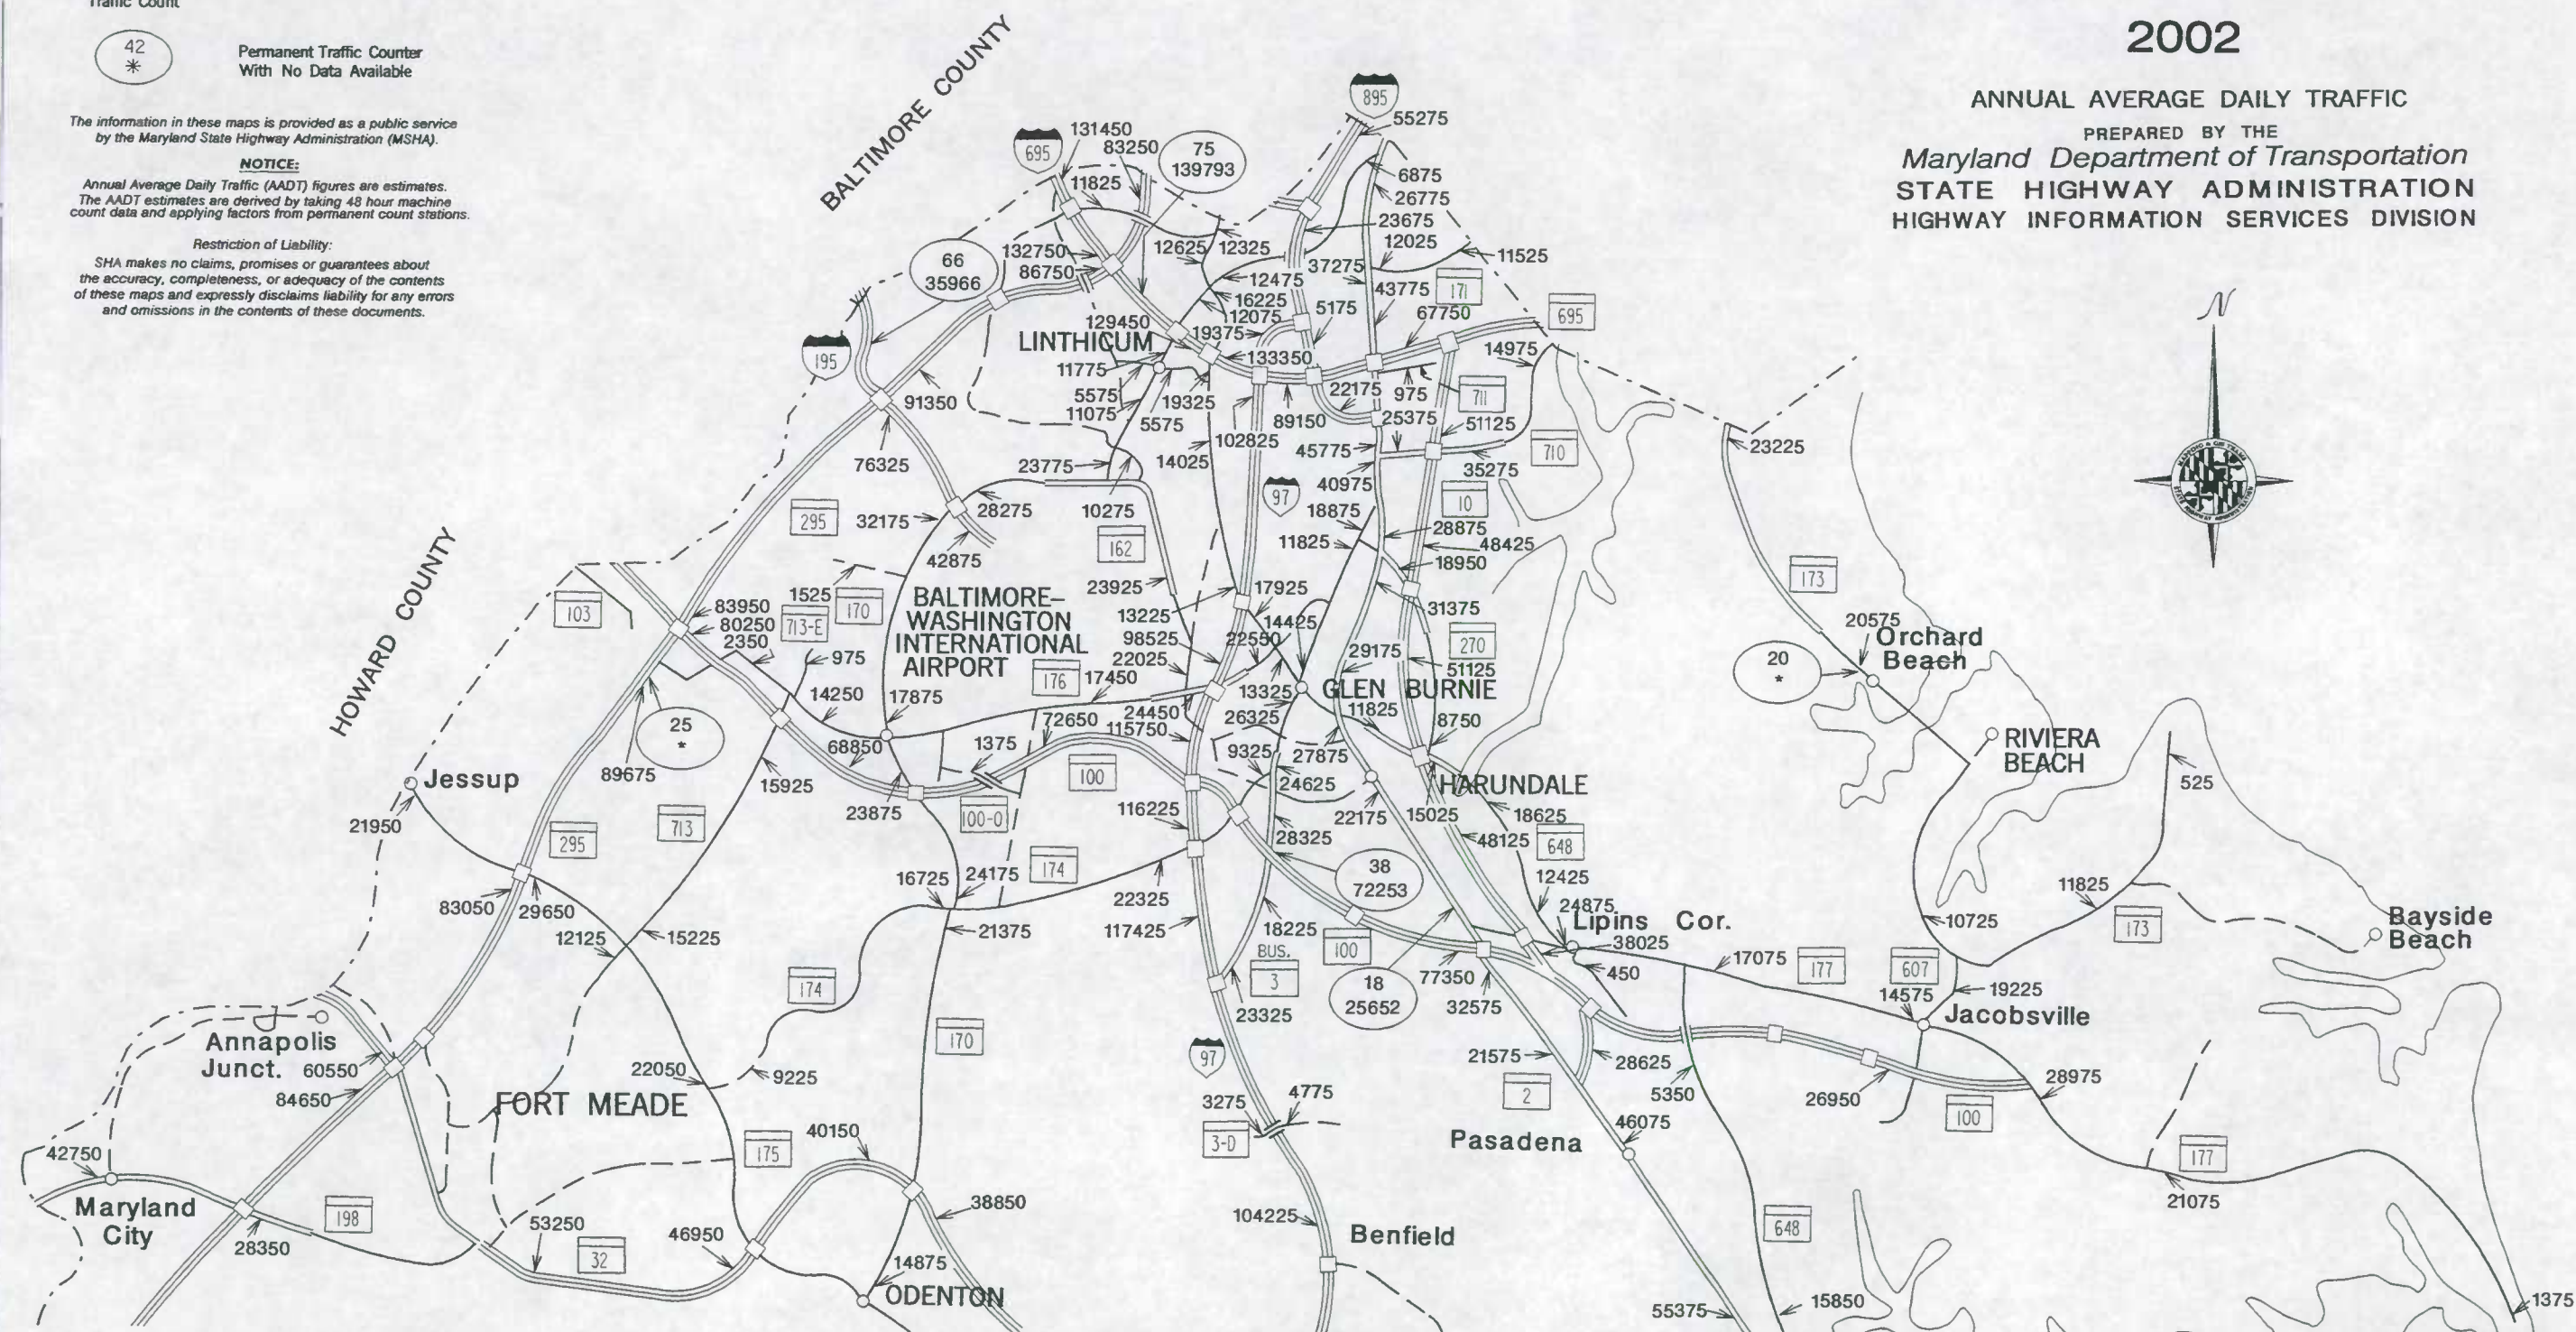

Restriction of Liability:

SHA makes no claims, promises or guarantees about
the accuracy, completeness, or adequacy of the contents
of these maps and expressly disclaims liability for any errors
and omissions in the contents of these documents.
